Flatwater Hops

Recent experiments have shown that the Flatwater Group’s office is a prime location for the indoor cultivation of Humulus Lupus, commonly known as Hops. As an Environmental Consulting Firm dedicated to Water Resources Engineering, we felt compelled to further research this very important water additive.

First Growth
4”/day (11 April 2011)

Hop Rhizome
Variety: Nugget

2009 Hop Bine
Length: 24feet

2009 Hop Cones
Harvest: 8ounces

22 April - 4ft
